

World's Newest, Most Innovative Sustainable Technologies, Services to be on Display in Vancouver – March 26-28, 2014

March 10, 2014

Vancouver, Canada – A truly global marketplace of environmental and energy solutions, the GLOBE 2014 Exposition returns to the Vancouver Convention Centre from March 26-28. The Exposition will host upwards of 400 exhibitors in close to 50,000 square feet of space that includes international pavilions, individual companies, market leaders and up-and-comers focused on the key themes of Energy, Green Building & Sustainable Cities, and Water.

“Since 1990, the GLOBE Exposition has been the place for a first look at the tools, technologies and innovative products that in one or two years will be commonplace for businesses around the world that want to be better at sustainability while improving their bottom line,” says John Wiebe, President and CEO of the GLOBE Foundation. *“Nowhere else will you see in one place the latest in net zero building technologies, wastewater treatment systems, transportation solutions and other innovations that will have an effect on millions of people worldwide.”*

Countries from around the world bring a significant amount of business research, information and opportunities to showcase at the Exposition. Making their GLOBE debuts, Malaysia and Poland will be joining representatives from countries including Austria, China, Dubai, Germany, France, Japan, The Netherlands, United States, United Kingdom, and many others.

“GLOBE is known worldwide as the barometer of policy and trends in the industry,” says Nigel Bosworth, CEO of Pointsource Processing Inc. a GLOBE Exposition participant. *“We attend to make significant international connections and gain invaluable knowledge about what others are doing in the marketplace. What you have in this event is globally applicable solutions and products that will benefit daily lives.”*

Along with international pavilions and specialty showcases, visitors to the GLOBE 2014 Exposition will be exposed to product launches, workshops, and for the first time, the GLOBE Powerhaus Pavilion, featuring the Power Pitch Presentation series, designed to create new investment opportunities for organizations from around the world.

The GLOBE 2014 Exposition is part of North America's largest international environmental business summit. Over the past 24 years, the GLOBE Series has become the nexus for global networking and leadership on the business of the environment. In 2014, GLOBE will once again serve as the consummate place to transform environmental challenges into lucrative business opportunities.
